## DUROFIL® – A Plus of Advantages

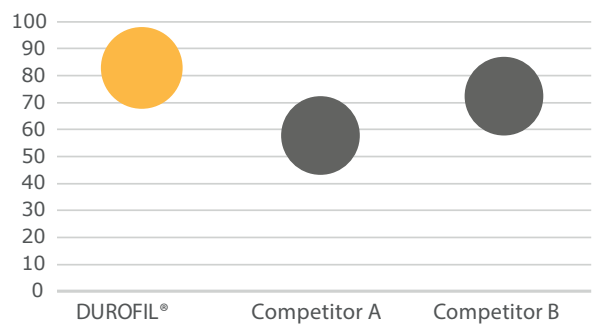

Over the years, FILTROX has developed filter sheets with and for brewers to find ideal solutions for their challenging tasks. Especially for the demanding application of pre-coat filtration with plate and frame filters, they demand a strong and reliable solution for daily use. Due to the high forces and long service lives, the support sheet must be an effective partner for filtration needs of brewers worldwide.

With the DUROFIL® support sheet, we have developed a reliable solution for your daily work, offering unique advantages. During our extensive development period, we have demonstrated and proven these advantages in the field. The highest wet tensile strength proves the superior durability of DUROFIL®. Our innovative sheet surface results in improved cake release reducing downtime in between filtration cycles. And even when using very fine filter powders, the DUROFIL® support sheet delivers the highest retention rates and thus maximum process reliability.

**Wet Tensile Strength [N/25mm]**

**Retained particles [%]**

### **A Plus of Advantages with DUROFIL®:**

- Strong sheet for heavy duty use
- Robust sheet surface for increased sheet life
- Innovative sheet surface for improved cake release
- Lowest drip-loss values
- Ideal powder retention capacity

This sheet also works for other applications like sugar filtration, basically anywhere where strength, product safety and durability are a key factor. FILTROX DUROFIL® is your reliable partner for pre-coat filtration with any filter aid.
